+ CONTINUITY INSTEAD OF SHORT-TERM RESULTS

For more than five decades, WW+KN has been associated with experience, reliability, continuity, integrity and responsibility. Many of our clients have been with us for decades, some even into the second or third generation.

In recent years generally deteriorating values in society have been increasingly discussed. Globalization in particular has reinforced the effects of short-term capital orientation, lack of responsibility towards employees and business partners as well as non-existent moral values.

WW+KN stands deliberately against these trends and continues to rely on the classic virtues of medium-sized companies. Stability, reliability and honesty are extremely important when working together with our employees and our clients.

+ ADVICE INSTEAD OF LECTURE

Good personal relationships and mutual respect guarantee a pleasant collaboration and joint success. Thus, it is most important to us that our clients can rely on our advice. Suggested solutions are analyzed with pro's and con's. We understand our service as true advice and not as a lecture. We want our client to decide for himself which solution suits him best.

+ AWARD-WINNING EXPERTISE

Our office has repeatedly been accredited as one of the 150 leading tax consultancies in Germany by the business magazine FOCUS MONEY*. Our office is included in the TOP-tax advisor list in the category "large firms" of the magazine.

*Every year FOCUS MONEY conducts a survey in which all German tax consultancies – more than 40,000 – can participate and on this basis the leading offices are announced.
